

**Clue 5:**

Join a light and a medium half-square triangle to make a square.

Press the seam toward the medium.

Make 48 of these and label them Clue 5.

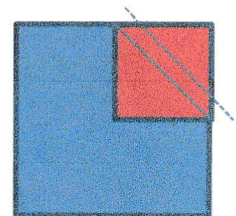

Note: If you cut the triangles a little big you will need to trim them to 3 1/2" squares.

**Clue 6:**

Use the folded corner technique to add corners to a 4 1/2" light square.

Folded corner technique – place a small square on the corner of a larger square. Sew on the diagonal of the small square. Press the inner flap out to match the corner of the larger square. Unfold the flap and cut away the two layers of fabric at the corner.

Add one medium and one dark 2 1/2" square to opposite corners of the 4 1/2" light square.

Make 24 of these units and label them Clue 6.
